Project Name:	InvestIQ
Team:	Techno Stack
Project Description:	For investors
	who struggle with analyzing market trends and making informed financial decisions,
	the InvestIQ AI application
	is a smart investment assistant
	that analyzes stock market trends, processes real-time financial news, and provides personalized investment insights and risk alerts.
	Unlike traditional investment platforms that only offer raw data and generic analytics,
	our application leverages AI-driven time series analysis and natural language processing to deliver real-time, context-aware financial recommendations tailored to users' personal financial goals and life events.
Benefit Outcomes:	- Better investment decisions with AI-driven insights and alerts - Personalized financial recommendations based on user behavior and market trends - Real-time market sentiment analysis for timely and informed trading - Reduced research time by consolidating key financial insights into a single platform
